Facilities Consulting

Consider cGMP Consulting for your next cGMP regulated facility or engineering project. We have extensive experience with 21 CFR 211.42 design and construction features for both multimillion dollar construction and expansion projects as well as startups and small businesses. Here's how we can help your next project be on budget and on time.

We provide consultation in any or all phases:

We support your project by:

- Monitoring time and materials, staffing, budget, and quality of work while confirming:
 - Materials and quality meet specifications
 - Procedures are followed
 - Documentation is accurate, current and complete
 - Invoices and quotes are monitored and accurate

Expertise

Provide expertise your organization may not possess. Our consultants have extensive experience that is often difficult to resource internally.

Bandwidth

Provide bandwidth for a temporary need within your organization. We will work with your architects, designers, and construction companies to keep within scope.

Value

Our experience will create fewer disruptions and less rework. We can divide the project into phases to minimize operational disruptions.
